PROFESSIONAL SUMMARY

Unity Developer with 4+ years of production experience building game-play systems, internal tools, and automated pipelines across mobile and large-screen platforms. Grown from feature implementation to owning complete systems and leading full project development. Known for a strong systems-oriented approach with a focus on performance, maintainability, and reducing technical risk.

EXPERIENCE

Vihaa Technologies LLP

Feb 2022 – Mar 2026

Unity Developer

- Led end-to-end development of [a full game title](#), owning core game-play systems, architecture, and implementation.
- Implemented 15+ game-play modes across multiple shipped projects, including new game loops built from scratch.
- Built internal tools to automate localization workflows and handle complex language edge cases, reducing manual effort significantly.
- Identified and resolved runtime and rendering bottlenecks, improving project performance across multiple titles.
- Designed custom systems to replace third-party dependencies, reducing technical risk and improving long-term maintainability.
- Owned asset delivery pipelines using PAD and AWS, and configured multi-store submission setups.
- Built Jenkins-based CI/CD build automation, reducing iteration time and manual build overhead.
- Delivered a large-screen feature showcased at [Android I/O 2024](#).

VOLUNTEER EXPERIENCE

Unannounced Horror Game — Indie Studio

May 2026 – Present

Lead Programmer (Volunteer)

- Serving as the lead programmer on an unannounced horror game being developed in Unity within a indie studio environment.
- Collaborating with a multidisciplinary team members including artists, designers, and other creatives.
